Surat, Gujarat | +91 9157227149 | niharsakhreliya4@gmail.com | Portfolio: niharsakhreliya-portfolio.vercel.app
LinkedIn: linkedin.com/in/nihar-sakhreliya | GitHub: github.com/Sakhreliya-Nihar

Computer Science undergraduate specializing in Cybersecurity with expertise in Software and Security Testing and hands-on experience in Automation and manual Testing, BBT, VAPT/WAPT, Bug Hunting, python, SQL, and MITRE ATT&CK Framework. building scalable web applications that turn complex problems into reliable, user-friendly products. Seeking Software Tester, Software Developer, Security Tester opportunities.

TECHNICAL SKILLS

- **Programming Languages:** - Python, Java, Html, SQL, JavaScript
- **Frontend:** - React, Tailwind CSS
- **Backend:** - GraphQL, REST API, Firebase
- **Database:** - MongoDB, MySQL
- **Cybersecurity & testing:** - Software Testing, VAPT/WAPT, API testing, Black box testing
- **Tools:** - Git, GitHub, Selenium, Postman, Jest, Splunk, Burp Suite, Metasploit, Nmap, Shodan, Amass, Tenable Nessus, Nuclei

EDUCATION

B.Tech, Computer Science & Engineering (Cyber Security)

2023 – 2027

P P Savani School of Engineering

CGPA: 7.9/10

WORK EXPERIENCE

The Developers Arena

May 2026 – Present

- Building real-world web development projects while following industry best practices.
- Developed a Python web application for managing restaurant menus and maintaining databases.
- Completing weekly project submissions and technical assessments in a self-paced environment.

Bug Hunter

2023 – Present

- Finding security vulnerabilities in public/private and government programs.
- Secured companies like Shiprocket, IBM, NASA, Sky-Akamai, Alshaya, Dyson, NCIIPC (Government of India), and many more

ACHIEVEMENTS

- Winner of University CTF and Bug hunting competitions.
- **IBM:** Recognized and awarded by the IBM security/product team for successfully identifying and reporting a critical bug.
- **Industry Recognition:** Earned multiple swags and acknowledgments from various organizations for Security testing.
- Top 2% rank on TryHackMe.

PROJECTS

- **Student Achievement & Certificate Authentication System:** The project was developed using Python and the Flask framework for the backend, with HTML5, CSS3, JavaScript, and Bootstrap for building a responsive and user-friendly interface. It uses MySQL for secure data storage, integrates hashing for certificate verification.
Key Features: Engineered a secure, role-based web application for student and faculty management and featuring an automated verification module to cross-reference and detect fraudulent academic certificates.
- **AIRS: AI-powered Incident Response Solution for SMEs:** A.I.R.S is a security dashboard developed using React, Python, FastAPI, and Firebase. It is an LLM-powered incident response assistant designed specifically for SMEs. The system will interpret and communicate cybersecurity events clearly and effectively. By integrating existing open-source detection tools with a lightweight local Large Language Model (LLM), the system translates technical security alerts into simple, summarised descriptions with risk scores and recommended mitigation steps.
- **Vajra:** Lightweight SSRF hunting tool written in bash.

CERTIFICATES

- Google CyberSecurity Professional Certificate
- Multicloud Network Associate Certificate
- NPTEL practical Cyber Security for cybersecurity practitioner
