Computer Science undergraduate specializing in Cybersecurity and AI integration, with hands-on experience in python, Firebase, SQL, and Cybersecurity. building scalable, cloud-ready web applications that turn complex problems into reliable, user-friendly products with expertise in bug hunting. Seeking Software Developer, Offensive Security roles, Web Developer or Software Tester opportunities.

TECHNICAL SKILLS

- **Programming Languages:** - Python, Html, SQL, JavaScript
- **Frontend:** - React, Tailwind CSS
- **Backend:** - GraphQL, REST API, Firebase
- **Database:** - MongoDB, MySQL
- **Cybersecurity & testing:** - Software Testing, VAPT/WAPT, Postman, Black box testing
- **Tools:** - Git, Github Actions, Wireshark, Splunk, Burp Suite Pro, Metasploit, Nmap, SQLMap, Hydra, Shodan, Censys, Amass, Tenable Nessus, ZAP, Nuclei, Virustotal, URLScan

EDUCATION

B.Tech, Computer Science & Engineering (Cyber Security) 2023 – 2027

P P Savani School of Engineering

CGPA: 7.9/10

JB & Karp Vidhya Sankul, Kamrej 2021 – 2023

Higher Secondary (GSHSEB)

Percentage: 78.46%

Kautilya Vidyalaya, Kamrej 2020 – 2021

Secondary School (GSEB)

Percentage: 82.16%

WORK EXPERIENCE

The Developers Arena May 2026 – Present

- Building real-world web development projects while following industry best practices.
- Developed a Python web application for managing restaurant menus and maintain databases.
- Completing weekly project submissions and technical assessments in a self-paced environment.

Bug Hunter 2023 – Present

- Finding security vulnerabilities in public/private and government programs
- Secured companies like Shiprocket, IBM, Nasa, Sky-Akamai, Alshaya, Dyson, NCIIPC (Government of India), and many more

ACHIEVEMENTS

- Winner of University CTF and Bug hunting competitions.
- **IBM:** Recognized and awarded by the IBM security/product team for successfully identifying and reporting a critical bug.
- **Industry Recognition:** Earned multiple swags and official acknowledgments from various organizations for Rsecurity research and vulnerability reporting.
- Top 2% rank on try hack me

PROJECTS

- **Student Achievement & Certificate Authentication System:** Engineered a secure, role-based web application (PHP, MySQL) for student and faculty management and featuring an automated verification module to cross-reference and detect fraudulent academic certificates.
- **AIRS: AI-powered Incident Response Solution for SMEs:** LLM-powered incident response assistant designed specifically for SMEs. The system will interpret and communicate cybersecurity events clearly and effectively. By integrating existing open-source detection tools with a lightweight local Large Language Model (LLM), the system translates technical security alerts into simple, summarised descriptions with risk scores and recommended mitigation steps. It will also serve an educational role, raising cybersecurity awareness among SMEs, and helping to reduce future risks.
- **Hardware:** Multiple hardware and network hacking projects like RFID based Attendance System using Arduino and NodeMCU
- **NetLeak:** A browser extension that actively detects exposed secrets/tokens/Api/credentials while browsing.
- **Vajra:** Ligh-weighted SSRF hunting tool written in bash.

CERTIFICATES

- Google Cyber Security Professional
- Multicloud Network Associate
- NPTEL practical Cyber Security for cybersecurity practitioner

LANGUAGES

- Hindi – Full professional proficiency
- Gujarati – Native proficiency
- English – Full proficiency
